

Fullstack Developer (m/f/d)

Stellenbeschreibung

Our company ELOGplan GmbH shows that software development and the waste management industry can go hand in hand.

In a world in which digitalization and climate change are increasingly shaping society, we have set ourselves the task of addressing both challenges together. Our answer to this is Cleverwaste®.

Cleverwaste® stands for the comprehensive digitalization of daily business in the waste disposal industry. It offers waste disposal companies powerful tools for process optimization, enabling them to operate in a much more resource-efficient manner.

Direct resource savings, such as the elimination of paper and more efficient order planning per employee, are essential. But aspects such as route optimization for drivers also make a significant contribution to tackling climate-related challenges. Only by uncovering problems and suboptimal processes can we tackle them and develop both ourselves and the company.

The future holds further challenges for society and companies. We are determined to actively tackle them and to develop and provide sustainable solutions.

Qualifikationen / Anforderungen

- Successfully completed studies in (business) informatics or a comparable qualification, e.g. training in the field of application development
- Experience in software development
- Analytical and process-oriented thinking
